## EDUCATION

Carleton University, Ottawa

Sep 2019 – Dec 2023

Bachelor of Computer Science Honours With **High Distinction** (GPA: 11.20/12.00)

Minor in Psychology.

- Deans' Honour List 2021, 2022 and 2023.
- Received Carleton's \$8000 Entrance Scholarship for incoming undergraduates with GPAs of over 85%.
- **Relevant Courses:** Data Structures & Algorithms, Web Development, Object-Oriented Software Engineering, Database Management Systems, Design and Analysis of Algorithms, Software Quality Assurance, Trends in Big Data Management, Human-Computer Interaction.

## SKILLS AND TECHNOLOGIES

- **Languages:** Java, JavaScript, Python, C++, C, HTML.
- **Frontend:** React.js, CSS.
- **Backend:** Node.js, Spring, Spring Boot, PostgreSQL, JUnit5, Selenium, Cucumber, MongoDB, Mongoose.
- **Others:** Maven, Windows, Linux, macOS, UML diagrams, Postman.

## PROJECTS

### Crazy 8's Game

Tools: Java, React, Spring, Spring Boot, WebSockets, Selenium, JUnit5, Cucumber, GitHub, Maven, Postman.

- Engineered a real-time multiplayer web application using **Spring Boot**, **WebSockets** and **React**, enabling seamless communication among four players across multiple browser tabs playing Crazy 8's.
- Created an automated acceptance test suite with **Selenium** and **Cucumber**, effectively implementing Behaviour-Driven Development (**BDD**) principles to ensure adherence to user requirements.
- Developed unit tests with **JUnit5**, practicing Test-Driven Development (**TDD**) to ensure a reliable and robust codebase.

### Movie Database Website

Tools: Node.js, MongoDB, Mongoose, Express, React, GitHub, Postman.

- Developed a responsive full-stack web app using **Node.js**, **Express** and **React** that contains information about over 8000 movies from the IMDb API.
- Implemented intuitive interfaces for user registration, authentication, and profile management using **React** components.
- Designed and implemented a scalable cloud-based database structure with **MongoDB Atlas** enabling real-time data synchronization.
- Built a public **JSON RESTful API** that supports **CRUD** operations for movies, cast members and users.

### Bookstore Database Application

Tools: Python, PostgreSQL, GitHub.

- Designed a normalized bookstore database that minimizes data redundancy and maximizes integrity.
- Implemented features required by a bookstore owner such as searching, generating sales reports and adding books using the Google Books API.

## VOLUNTEER EXPERIENCE

Redeemed Christian Church of God, My Father's House

Ottawa, Canada

Software Engineer

Feb 2024 - Present

- Utilized Squarespace to maintain and update website content, ensuring accuracy and relevance of information for visitors.
- Implemented SEO strategies to enhance online visibility and attract 75% more traffic to the church's website, resulting in improved engagement and outreach.
