EDUCATION

Carleton University

Ottawa, ON

Bachelor of Computer Science (Honours), Minor in Psychology

June 2024

- Graduated with High Distinction. Dean's Honour Roll throughout degree.

EXPERIENCE

Product Manager

May 2026 – Present

Visualping

Ottawa, ON

- Led the end-to-end delivery of Google SSO integration, reducing friction during onboarding and increasing user sign-ups by 30%
- Owned and delivered product initiatives that increased trial activation by 12% through experimentation and onboarding improvements
- Leverage customer insights and product analytics to identify automation opportunities and improve operational efficiency

Software Developer (Internal Tools)

Jan. 2025 – Present

Visualping (Concurrent Role)

Ottawa, ON

- Architected and developed an internal administration platform using Next.js, React, TypeScript, and Tailwind CSS to support customer operations and internal business workflows
- Designed secure REST APIs and role-based workflows that eliminated the need for Sales and Customer Success teams to have direct write access to production databases, significantly reducing operational risk
- Led the redesign and development of the company's internal Admin Dashboard, contributing to a 45% reduction in customer support ticket resolution time
- Built internal tooling to support SOC 2 compliance initiatives by improving auditing capabilities and strengthening administrative controls

Customer Success Specialist

Nov. 2024 – May 2026

Visualping

Ottawa, ON

- Supported enterprise customers by diagnosing frontend, backend, API, and infrastructure issues while collaborating closely with Engineering on production incidents
- Developed expertise in browser automation, proxy infrastructure, and large-scale web monitoring systems used by enterprise customers

PROJECTS

Chessmask | [Live Demo](#) | *Next.js, TypeScript, Tailwind CSS, WebAssembly, Jest*

- Developing a browser-based chess visualization platform that teaches blindfold chess through progressively difficult training exercises
- Building AI gameplay integration using WebAssembly while designing the platform for future monetization and scalability

Crazy 8's Multiplayer Game | *Java, Spring Boot, React, WebSockets, Selenium, JUnit5, Cucumber*

- Built a real-time multiplayer web application supporting four concurrent players using Spring Boot, WebSockets, and React
- Implemented automated acceptance testing with Selenium and Cucumber alongside unit testing with JUnit5 following TDD and BDD practices
